W73P

Plug in Guide

1. Unbox the phone, gather all elements for the handset (pictured below) and assemble.

2. Get the charging cradle and one power supply out. Plug in the charging cradle.

3. Sit the phone in the cradle – it should power up.

4. Gather the remining items in the box to set-up the bases station. Please note there will be a power supply (circled below in red) but you should no need this. The switches IVC use have POE (Power over Ethernet) so the base station will get its power form the network. However, please retain in case you are having issues.

5. Plug the network cable into the network port on the base station (circled in Green below).
6. Plug the other end of the cable into the wall port.
7. Fit the stand as required. The phone and base station should then automatically link and the lights three lights on the front of the base station should turn solid green.

If you are having any difficulty following this guide or you are unable to get the handset to come live, please contact the support team on 02036753399 (or email them at cloudsupport@onecom.co.uk).

If this is part of a new handset order, please remember you will have to contact the support team to assign he handset. Please have your ticket number to hand as per the email you will have received when the handset was dispatched.
